 Rand

The Experimental AO #DAQE-AN0327011-03, dated February 14, 2003 was issued so that IPP could conduct tests on the overfire air system on unit 1. The testing was for so that IPP could gather data needed to modify the existing AO and Title V permit and to also perform other testing that IPP needed to verify the OFA systems effectiveness. This gave you approval to perform testing on unit 1 and the OFA for up to 150 days from when the Exp AO was issued.

If you determine that at the end of the 150 days that you still need to perform additional testing please feel free to contact us on the possibility of reissuing or extending the current EXP AO. If you have any additional questions please feel free to call me at (801) 536-4052.

Nando

 Rusty,

Pursuant to our conversation on Monday, the attached letter is being forwarded through Rick Sprott. Since timeliness is an issue, I thought this e-mail copy would get an earlier start on things. Please review and let me know your thoughts on this. We didn't bother getting into economics at this point. If your initial feeling is that our request is beyond what your Staff can authorize, please let me know as soon as you can. Feel free to get back to me with any questions you might have. Thanks
